

**Window
World™**

Standing tall alongside the vision, aesthetics and environmental sensitivity of architects and designers. Window World presents a range of door and window systems to bridge the leap from drawing board to reality with an ease and precision of engineering that translates into no compromises. Combining strength and durability with exquisite style, window world uPVC doors and windows conform to the most stringent international benchmarks which guarantees you absolute satisfaction.

Today uPVC has lived upto its promised potential as building material of the future. There are only few landmarks in recent global architectural history that do not incorporate this material in their designs. From Skyscrapers to aeroplanes uPVC and its ready acceptance in all state of the art designs. Its strength , durability and versatility of form as well as colour and finishes makes it an ideal substitute for steel aluminium and wood in door n window frames.

At Window World's production unit the uPVC profile material is crafted in precise , unique and exciting customized solutions that meet the exact needs of architects , interior designers and home owners.

ALUMINIUM BUILDING SYSTEMS ENGINEERED FOR PERFORMANCE

Our high performance solutions deliver the aesthetic design and functionality that sets our products apart in the market.

WINDOWS & DOORS

Our aluminium window and door systems are inherently strong, lightweight and sustainable, providing contemporary aesthetic profiles along with exceptional performance.

Secure and robust, our systems have been designed to meet and exceed requirements, while a complete range of accessories, design options and configurations offers unrivalled flexibility in terms of aesthetics and functionality.

SLIDING DOORS

AluK's aluminium sliding door systems offer slim profiles and enable large expanses of glazing to maximise light transmission, while maintaining internal temperatures and weather tightness when closed. Robust and durable, they are highly secure and rigorously tested to meet industry regulations. Through a wide range of standard and optional features, our sliding door systems can achieve the right look and performance for any project.

ALUK

FOLDING DOORS

Our aluminium folding door systems combine the strength and lightweight properties of aluminium with form and function of the highest standard. Highly versatile and configurable, they offer maximum control over the style and operation of the doors, accommodating the design specifications of any project. Multiple panels can be added with open in or open out door options for faultless operation, with accessibility and security at the heart of our systems

CURTAIN WALLING SYSTEM

Our unique curtain walling systems offer the flexibility and advanced functionality demanded by modern buildings. Combining strong but lightweight aluminium profiles with glazed sections, our systems can be faceted, double skinned, curved or angled to create the desired finish, whilst offering maximum light transmission into the building with minimum profile sight-

line performance and all our systems include a wide range of features to provide complete design flexibility

SHUTTERS & LOUVERS

AluK shutters and louvers are designed to provide outstanding protection against external agents, such as noise, pollution, and weather.

Our low maintenance screen solutions can be integrated into doors and windows, offering a secure, high performance choice that can enhance the look and feel of any building.

ALUK

BALUSTRADES

Secure and durable, our balustrade systems conform to industry requirements to ensure optimum performance and user safety for a range of applications, including balconies and swimming pools.

With a variety of nishes and accessories available, our systems are highly configurable and adaptable to your requirements.

ENCRAFT

ART OF PRECISION

uPVC SOLUTIONS FOR HOME TO BUSINESSES FOR YOU

Well, on average, uPVC windows are known to last for 20 years and more. The reasons why these can last for more than two decades .

WINDOWS & DOORS

Providing complete window solutions, from initial design to production and final installation of window systems for both home and commercial use, ENCRAFT systems are number one in styling and a benchmark for engineering precision. ENCRAFT systems come in a range of shapes and sizes, are custom designed to suit the local requirements, fabricated to exact dimensions and fitted-to-suit the particular requirement options.

Be it any design or specification, ENCRAFT has a solution – of style and elegance to meet all expectations.

CASEMENT WINDOWS

ENCRAFT Casement Window range is designed to provide the maximum flexibility for clients. The system is based on a two profile depths - 42 and 62 mm and was designed to facilitate maximum application coverage with the minimum number of profile sections providing clients with the ideal range of products to suit any window replacement program or building type in the fast growing construction industry.

1. Contemporary modern soft line profile appearance.
2. 10 mm sash overlap for enhanced performance.
3. Internal glazing options from 4 mm single to 36 mm triple
4. Choice of single or multi-point locking devices
5. Build-in hardware location facility for hinges, striker etc.
6. Secure hardware fitting into steel reinforcements as standard.

SLIDING WINDOWS

ENCRAFT Sliding Window range is designed to provide the maximum flexibility for clients. Based on a range of sections, it offers full flexibility offering from single sliding to multiple sliding operators, clip on or integrated sections for fly screen and a range of section sizes covering small and large openings. It provides the ideal range of products to suit any window replacement program or building type in the fast growing construction industry.

1. One, two and three track sliding, window and fly screen options.
2. Multi-chamber profile design, frame depth from 62 to 112 mm.
3. 10 mm sash overlap for enhanced performance.
4. Internal glazing options from 4 mm single to 22 mm double.
5. There is a choice of single or multi-point locking devices.
6. Secure hardware fitting into steel reinforcements as standard.

TILT N TURN WINDOWS

ENCRAFT Tilt N Turn Windows are designed to provide a European window option for clients. The window is available as part of the EN62 range and was designed to give the discerning end user a state of the art inward opening fenestration solution.

The ENCRAFT Tilt N Turn provides the client maximum design freedom due to larger opening sizes that can be achieved and suits any window replacement program or building type in the fast growing construction industry.

1. Contemporary modern soft line profile appearance.
2. 10 mm sash overlap for enhanced performance
3. Internal glazing options from 4 mm single to 36 mm triple
4. Heavy duty hidden hinges for continuous weather seals
5. External sliding y screen system.
6. Secure hardware fitting into steel reinforcements as standard.

TWINSASH WINDOWS

ENCRAFT TwinSash Windows are designed to provide ultimate flexibility for clients. It provides the option of combining the traditional casement window with traditional inward opening fly screen option. A security grill or privacy blinds can be added. It also has a sash with integrated louvres and a fly screen option. It was designed to provide maximum application coverage with minimal profile sections, giving the end user the ideal product range..

1. Contemporary modern soft line profile appearance.
2. Design compatibility with the EN casement and sliding range.
3. 10 mm sash overlap for enhanced performance
4. Integrated solution for security grill and fly screens
5. Choice of single or multi – point locking devices
6. Secure hardware fitting into steel reinforcements as standard.

PARALLEL WINDOWS

ENCRAFT Parallel Windows are designed for maximum ventilation and ideal for staircases, landings and offices. With a maximum sash size of 2 meters (6.6 feet) wide and 2 meters (6.6 feet) tall it caters for large openings, giving plenty of light to the area. With a weight carrying capacity of 200kg per sash the glazing options are almost limitless. There is a facility to incorporate a security grill or blinds for security or privacy.

1. Can be inward or outward opening.
2. Glazing options from 4 mm single to 36mm triple.
3. Internal sash options with fly screen or glazed as above
4. Integrated solution for security grill
5. 3 frame options to choose from
6. Multi point locking devices.

VERTICAL SLIDER WINDOWS

A traditional fenestration concept, ENCRAFT Vertical Slider Windows are the perfect solution for ancillary frames when the opening aperture is taller than width (golden ratio 1:1.618) and one opening sash is required for ventilation or re-escape! It works by using two frame-specific, site-tensioned spiral balances to hold the sash open in any position. So the modern uPVC vertical slider fits perfectly into both straight through and reveal apertures.

1. Contemporary modern soft line appearance.
 2. 10 mm sash overlap for enhanced performance.
 3. Internal glazing options from 4 mm to 22 mm.
 4. Integrated handle bead for convenience
- Custom spiral balances for sash weight and frame size
6. Opening sash with espagnolette lock

FOLD N SLIDE WINDOWS

ENCRAFT Fold N Slide Windows system offers superior operating performance and smooth integration into any architectural style and space. The window system is engineered for using multiple panel from 2 to 7 panels, this system offers unobstructed opening options. The hardware used offers a smooth glide and reliable performance with solid design and engineering

1. Can be opening in or out
2. 2, 3, 4, 5, 6 and 7 pane option
3. ENCRAFT top and bottom track for perfect alignment
4. Integrated solution for security grill
5. Internal glazing option from 4mm single to 36mm triple glazing
6. Up to 18'8" frame width and 100 kg sash weight are possible.

COMBINATION WINDOWS

ENCRAFT Combinational Turn-Top Hung windows are suitable for opening in while turn application and opening out while using in top hung mode, can be used as ventilators. The windows are available as part of the EN62 and EN42 range, designed to provide multiple application grouped together to form one comprehensive unit. Looks aesthetically grand and imposing.
